

WisDOT Roundabout Guide, April 2008 Table of Contents

Facilities Development Manual 11-25-3, Intersection Control Evaluation

1 - Intersection Control Evaluation	1
2 - Early Evaluation Process	1
3 - Roundabout as viable alternative	7

Facilities Development Manual 11-26-1, General

1 - General	1
2 - Modern Roundabout vs. Other Circular Intersections	2
3 - Advantages and Disadvantages	3
4 - Roundabout Categories	4
4.1 - Mini-roundabouts	4
4.2 - Urban Compact Roundabout	5
4.3 - Urban Single-Lane Roundabout	5
4.4 - Urban Multilane Roundabout	5
4.5 - Rural Single-Lane Roundabout	5
4.6 - Rural Multilane Roundabout	5
5 - Defining Physical Features	5
6 - References	7

Facilities Development Manual 11-26-5, Design Process and Qualifications

1 - Roundabout Design Process and Qualifications	1
2 - Roundabout Designer Requirements	1
3 - Intersection Control Evaluation, Program Level Scoping phase	2
4 - The 3-Stage Roundabout Design Process	2
4.1 - Stage 1, Roundabout Design Process	2
4.2 - Stage 2, Roundabout Design Process	3
4.3 - Stage 3, Roundabout Design Process	3
5 - Roundabout Criteria	4

Facilities Development Manual 11-26-10, Multimodal Considerations

1 - Pedestrian and Bicyclist Accommodations	1
1.1 - Pedestrians	1
1.2 - Bicyclists	2
2 - Transit, Large Vehicle and Emergency Vehicle Considerations	3
2.1 - Transit	3
2.2 - Large and Oversized Vehicles	3
2.3 - Emergency Vehicles	4
3 - References	4

Facilities Development Manual 11-26-15, Agency and Public Coordination

1 - Public Awareness	1
2 - Public Meetings	1
3 - Informational Brochures, Videos, and Web Site	1
4 - Social, Environmental, and Economic Considerations	2
5 - References	3

Facilities Development Manual 11-26-17, Access Control

1 - Access Management	1
2 - Functional Intersection Area	1
3 - Corner Clearance and Driveway Location Considerations	2
4 - Interchange Ramps	2

Facilities Development Manual 11-26-20, Operations

1 - Design References and Methods	1
2 - Roundabout Operation	1
2.1 - Space Requirements and Capacity Limitations	1
3 - Roundabout Capacity	2
3.1 - Single-lane Roundabout Entry Capacity	2
3.2 - Single Lane Exit Capacity	3
3.3 - Multilane Roundabout Capacity	3
3.4 - Pedestrian Effects on Entry and Exit Capacity	3
4 - Operational Analysis Tools	3
5 - Key Roundabout Parameters Affecting Operating Capacity	3
6 - Rodel Software	7
6.1 - Entry Width	8
6.2 - Roundabout Performance Measures	9
6.3 - Testing for Weaknesses in Geometry and Capacity	10
6.4 - Testing for Exclusive Lane performance and Lane by Lane Performance	10
6.6 - Volume Diagram and Lane Configuration Sketch	11
7 - Operations and Entry Lane Pavement Markings	14
8 - Through Highway Declaration (ss 340.01(67) & 349.07)	15
9 - Speed Zone Declarations (ss 346.57 & 349.11)	15
10 - References	15

Facilities Development Manual 11-26-25, System Considerations

1 - System Considerations	1
2 - Adjacent Intersections and Highway Segments and Coordinated Signal Systems	1
3 - Roundabouts in an Arterial Network	1
3.1 - Planned Network, Access Management	1
3.2 - Platooned Arrivals on Approaches	2
3.3 - Roundabout Departure Pattern	2
4 - Closely Spaced Roundabouts	2
5 - Roundabout Interchange Ramp Terminals	3
6 - Traffic Signals at Roundabouts	3
7 - At-Grade Rail Crossings	3

Facilities Development Manual 11-26-30, Principal based Design Guidance

1 - Introduction	1
2 - Roundabout Design Process	2
3 - General Design Steps & Explanation	3
4 - Design Principles	6
4.1 - Designing With Trade-offs In Mind	6
5 - Geometric Design	7
5.1 - FHWA Section 6.2.1.2, Design speed	7
5.2 - FHWA Section 6.2.1.3, Vehicle Paths	7
5.3 - FHWA Section 6.2.1.5, Speed Consistency	8
5.4 - FHWA Section 6.2.2, Design Vehicle	9
5.4.1 - Other Considerations for Large Vehicles	10
5.5 - FHWA Section 6.2.3 Non-motorized design users	10
5.6 - FHWA Section 6.2.4, Alignment of approaches and entries	11
5.7 - FHWA Section 6.3.2, Entry width	11
5.8 - FHWA Section 6.3.3 Circulatory roadway width	11
5.9 - FHWA Section 6.3.4 Central island	12
5.10 - FHWA Section 6.3.5 Entry curves	12
5.11 - FHWA Section 6.3.8, Splitter islands	12

5.12 - FHWA Section 6.3.10.2, Length of conflicting leg of sight triangle	13
5.13 - FHWA Section 6.3.11.2, Superelevation	14
5.14 - FHWA Section 6.3.12 Bicycle provisions.....	15
5.15 - FHWA Section 6.3.15 Right turn bypass lanes.....	15
5.16 - FHWA Section 6.4.2 Vehicle path overlap and methods to avoid path overlap.....	16
5.16.1 - Method For Checking Path overlap	17
5.17 - FHWA Section 6.4.3 Design method to avoid path overlap.....	18
5.17.1 - Design Techniques to Increase Entry Deflection.....	19
5.17.2 - Approach Offset to Increase Entry Deflection.....	19
5.18 - FHWA Section 6.5.2 Curbing.....	19
5.18.1 - Approach curbs.....	19
5.18.2 - Curb and gutter separating the circulatory roadway from the truck apron	20
5.18.3 - Curb at the inside of the truck apron or edge nearest the central island	20
5.19 - Spirals.....	22
5.20 - Entry angle, phi.....	22
5.21 – Average Effective Flare Length = L'	24
5.22 - Shapness of Flare = S	24
5.23 - Clear Zone	25
5.24 - Coloring and stamping concrete	25
6 - Terrain	25
6.1 - Circulating Roadway (diameter).....	26
6.2 - Approaches/departures (intersection legs)	26
7 - References	26

Facilities Development Manual 11-26-35, Signing and Pavement Marking

1 - Signing.....	1
1.1 - Regulatory Signs	1
1.2 - Warning Signs.....	2
1.3 - Guide Signs	3
1.3.1 - Intersection Destination/Direction style signs	4
1.3.2 - Overhead Lane Guide Signs.....	4
1.3.3 - Exit Guide Signs – In Splitter Island.....	5
1.3.4 - Junction Assemblies	6
1.3.5 - Route Confirmation Signs	6
1.4 - Urban Signing Considerations	6
1.5 - Rural and Suburban Signing Considerations.....	6
1.6 - Closely Spaced Multiple Roundabouts	6
1.7 - Roundabouts in Close Proximity to Railroad Crossings	7
1.8 - Wrong Way Movements in Roundabouts	7
1.9 - Short Term Awareness Techniques.....	7
2 - Pavement Marking	7
2.1 - Approach and Entry Pavement Markings	7
2.1.1 - Approach marking.....	8
2.1.2 - Entrance emphasis pavement marking.....	10
2.2 - Circulatory Roadway Pavement Marking	10

Facilities Development Manual 11-26-40, Illumination, Landscaping, and Maintenance

1 - Illumination.....	1
1.1 - Need for Illumination	1
1.2 - Standards and Recommended Practices	2
1.3 - General Recommendations	4
1.4 - Light pole position	4
2 - Landscaping	4
2.1 - Landscape Design	6

2.1.1 - Owned, Operated, and Maintained by WisDOT.....	6
2.1.2 - Owned by WisDOT but Maintained by Others	7
2.1.3 - Local Roads and Connecting Streets	7
2.2 - Landscape Maintenance.....	7
2.2.1 - Owned, Operated, and Maintained by WisDOT.....	8
2.2.2 - Owned by WisDOT but Maintained by Others	8
2.2.3 - Local Roads and Connecting Streets	8
3 - Multi-use Path Installation and Maintenance.....	8
4 - References	8

Facilities Development Manual 11-26-45, Work Zone Traffic Control

1 - Work Zone Traffic Control.....	1
1.1 - Pavement Markings	1
1.2 - Signing	1
1.3 - Lighting	1
1.4 - Construction Staging	1
1.5 - Public Education	2

Facilities Development Manual 11-26-50, Design Aids

1 - Plan Preparation Considerations	1
1.1 - Alignment Plans	1
1.2 - Profile Information.....	1
1.3 - Typical Sections.....	1
1.4 - Plan Details.....	1
1.5 - Cross Sections.....	2
1.6 - Example Plan Sheets	2
2 - Truck Apron Sizing	2
3 - Creating Roundabout Fastest Paths (Spline Curves)	3
4 - Guide for Using AutoTURN Version 5.1 in Microstation Version 8.....	7
5 - RODEL, Stop Delay Verses Total Delay	11
6 - Lane Balance.....	12
7 - Maximum Queue	12
